

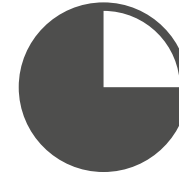

PHOTOVOLTAIC WATER HEATING

Commercial buildings

REDUCTION OF WATER HEATING BILL

SHORT PAYBACK PERIOD

MAINTENANCE FREE OPERATION

EASY INSTALLATION

DEVELOPED AND PRODUCED IN EUROPE

OFF-GRID SYSTEM

 **HIGH ENERGY SAVINGS**

Cost saving through reducing or eliminating the need for conventional water heating methods that consume electricity or gas.

 **FULLY AUTONOMOUS OFF-GRID MODE**

Water is heated solely by solar energy. The grid is being used only to supply control and communication modules.

 **FOR COMMERCIAL USE**

Designed for high performance up to 9 kWp of installed power.

 **REMOTE MONITORING**

Optional remote monitoring (recommended)

 **MAINTENANCE-FREE OPERATION**

Sophisticated design and high quality components are a guarantee of long-term trouble-free operation.

 **ECO-FRIENDLY**

Water heating using clean energy. It provides water heating without relying on fossil fuels.

 **WHERE TO USE**

Residential houses, sports facilities, wellness centers, holiday homes, hotels, restaurants.

 **EASY INSTALLATION**

Easy installation with minimal construction inconvenience.

 **MADE IN EUROPE**

Designed and produced in the Czech Republic. With respect for nature.
